

## PRODUCT RELEASE

Xinet 2024.0.2  
July 2024

## RELEASE SUMMARY

### The Xinet 2024.0.2 release includes

- Improved product quality due to additional internal fixes

### Resolved Issues

- Incorrect field description for "xmpMM:DocumentID" in Xinet. The standard field contained unreadable text that has now been fixed.
- Security issue with Flash content in Xinet. Removed the video-js.swf file and references as a security concern since Flash is end-of-life.

### Installation

The Installation Instructions can be found on the [Knowledge Base](#). You may find the installation files on the [Xinet Portal](#). RH9 requires one additional pre-installation step which is described in this document. If you encounter any issues, please contact our [support team](#).

### Server Prerequisites

- SERVER should be a Red Hat Enterprise Linux (RHEL) Server 64-bit version 9.0 or above
- Should have a valid RedHat subscription to download **codeready** packages

Installer will download the required RHEL 9 dependent libraries and services which require patching to make them work along with XINET.

### Certified Platforms

Below are the component versions that are officially supported by IgniteTech for this version of Xinet.

<b>SERVER</b>	Operating systems: Red Hat Enterprise Linux (RHEL) Server 64-bit version 9.1
